9.2 Matter Is Made of Particles

4th Grade Science · Video: Part(icles) of Your World (Crash Course Kids #3.2) (Crash Course Kids)

Name: _____ Date: _____

Watch the video and fill in the blanks as you go.

What Is Matter Made Of?

You and I are both made of _____.

Matter is anything that has mass (weight) and _____.

Matter is made of tiny _____.

Particles are so tiny that you _____.

How an object looks and behaves is called its _____.

Particles in Solids, Liquids, and Gases

Most matter comes in three _____: solid, liquid, or gas.

Particles in a solid are packed so _____ that they stay in place. They only jiggle (vibrate).

In a liquid, there is more space between particles, so they can _____.

There is so much space between gas particles that you can _____ in them easily.

When you walk across a room, you walk through gases that make up _____.

Matter Can Change States

When you light a candle, the solid wax begins to _____. A solid can become a liquid.

If you heat a liquid, its particles fly apart and become a _____.

When water boils, it becomes a gas called _____ (water vapor). A liquid can become a gas.

On a cold night, _____ in the air turns into tiny crystals of frost. A gas can become a solid.

Vocabulary

Word	Meaning
matter	anything that has mass and takes up space
particles	tiny pieces that make up all matter
states of matter	solid, liquid, and gas
frost	tiny ice crystals that form from water vapor on cold nights

Key Takeaways

• An object made of matter can change its properties when it _____.

• Solid, liquid, or gas, it is still always matter.

• Matter is made of particles, so particles are _____.
