9.4 Mixtures

4th Grade Science · Video: The Great Picnic Mix Up (Crash Course Kids #19.1) (Crash Course Kids)

Name: _____ Date: _____

Watch the video and fill in the blanks as you go.

What Is a Mixture?

A _____ is made by combining two or more different things.

Iced tea and _____ are both mixtures.

Solutions

If you mix sand and water, after a while the sand will _____ to the bottom.

When sugar is stirred into water, the sugar particles spread out _____ among the water particles.

This kind of mixture is called a _____.

The _____ is the stuff that dissolves, like the sugar.

The _____ is the stuff the solute dissolves in, like the water.

The air we breathe is a solution of gases. It is mostly _____ and oxygen.

Soda water is a solution of carbon dioxide _____ in liquid water.

Mixing things in a solution does not make a whole _____. Solutions can be separated again.

Solubility and Saturation

The ability of something to be dissolved is called its _____.

Sand has _____ solubility in water. Sugar has high solubility in water.

_____ is the point at which no more solute can dissolve.

If you add too much sugar, the extra will just sit at the _____.

Picnic Investigation

Fruit salad is not a solution, because its parts are not _____.

If we heat sweet tea, the water _____ and leaves the sugar behind.

Vocabulary

Word	Meaning
mixture	two or more different things combined
solution	a mixture where the particles are spread out evenly
solute	the part of a solution that dissolves
solvent	the part of a solution the solute dissolves in
solubility	how easily something dissolves
saturation	the point when no more solute can dissolve

Key Takeaways

• Solutions can be made of things in the same state, like the gases in air, or different states, like gas bubbles in soda.

• Mixing makes a mixture, not a new substance. The parts can be separated again.
