1.1 The Four Regions of Texas

4th Grade Social Studies · Video: 4 Regions of Texas Video Lesson (Social Studies with The Southern Teach)

Name: _____ Date: _____

Watch the video and fill in the blanks as you go.

Texas Has Four Regions

Texas is a large state with different landscapes, _____, and natural features.

Texas is divided into four main regions: Mountains and Basins, Great Plains, North Central Plains, and Coastal Plains.

Each region has unique characteristics that affect the way people live, work, and interact with the _____.

Mountains and Basins

The Mountains and Basins region is located in far _____ Texas.

It has tall rocky mountains, deep valleys, and a dry, _____-like landscape.

It gets very little _____. Summers are hot and nights are cool.

Guadalupe Peak, in the Guadalupe Mountains, is the _____ in Texas.

_____ is the largest city in this region.

Big Bend National Park is a popular place for visitors.

Great Plains

The Great Plains region reaches from the Texas Panhandle down into the middle of Texas.

It is mostly flat, with open _____, few trees, and rich soil.

The climate has hot summers, _____ winters, and moderate rainfall.

This region is known for farming and _____, especially cattle ranches in the Texas Panhandle.

_____, the second largest canyon in the United States, is in this region.

North Central Plains

The North Central Plains are west of the Coastal Plains, in the central part of Texas.

This region has _____, forests, and rich land.

It has hot summers, cool winters, and more rainfall than the Great Plains.

Many _____ flow through this region, so it is a good area for farming and ranching.

Cities like _____ and Abilene are located here.

Coastal Plains

The Coastal Plains is the most _____ region in Texas. More people live here than in any other region.

It stretches inland from the Gulf of Mexico and includes cities like _____, Austin, and San Antonio.

The land is flat, with sandy beaches, wetlands, and forests.

The climate is warm and _____, with the most rainfall of any Texas region.

This region is home to major _____ for shipping and trade.

Because it is near the Gulf of Mexico, _____ and tropical storms are common.

Vocabulary

Word	Meaning
region	an area with features that make it different from other areas
climate	the usual weather of a place over a long time
landscape	what the land looks like: mountains, plains, hills, or beaches
port	a place where ships load and unload goods

Key Takeaways

• Texas has four regions: Mountains and Basins, Great Plains, North Central Plains, and Coastal Plains.

• Rainfall goes up as you move from west Texas (driest) to the Gulf coast (wettest).

• Land and climate shape how people live and work in each region.
